

A Sanitary, Washable, Durable Coating for Plastered Walls Metal and Wood

WILL NOT discolor or fade with age. The white and all shades hold their colors without change when applied as directed.

Set slowly, and therefore a larger surface may be easily coated without laps or brush marks showing on the finished work.

When washed, OUR FLAT PAINT will not become shiny—it's always flat, and remains so.

Is much more economical than lead and oil paint, and is germ and vermin proof and carries that rich dull finish which cannot be produced with any other paint.

One gallon of this paint will cover 700 square feet of surface to the gallon, one coat. One coat gives good results on surfaces that have been painted; two coats are necessary on new work.

Use no Size of any kind with OUR FLAT PAINT. Just add one-eighth gallon Raw Linseed Oil to the gallon for the first coat.

 Be very careful not to get some IMITATION, as we were the first to perfect a Flat finish that did not require some kind of size coat to be used first.

Directions

Use no Size Prime the walls with OUR FLAT PAINT, to which add one-eighth gallon of Raw Linseed Oil. Apply and let dry.

Second coat should be applied when priming is dry. Flow paint freely and do not brush it out. IMPORTANT—One-half pint of Raw Linseed Oil should be added to each gallon of paint for the last coat.

For undercoats of Enamel, mix a quart of the Enamel you are going to use with each gallon of Flat Paint for the coat before the Enamel.

It is washable and waterproof.

It does not shine and glisten.

It goes farther than the heavier lead and oil paints.

It can be used from cellar to garret.

It has a great "spread" and is easy to work.

It shows no lap marks or brush marks.

It contains no poisonous substances.

It dries flat.

It requires the least number of coats.

Its ten colors are lime and alkali proof.

It can be used anywhere, from modest home to grand palace or skyscraper.

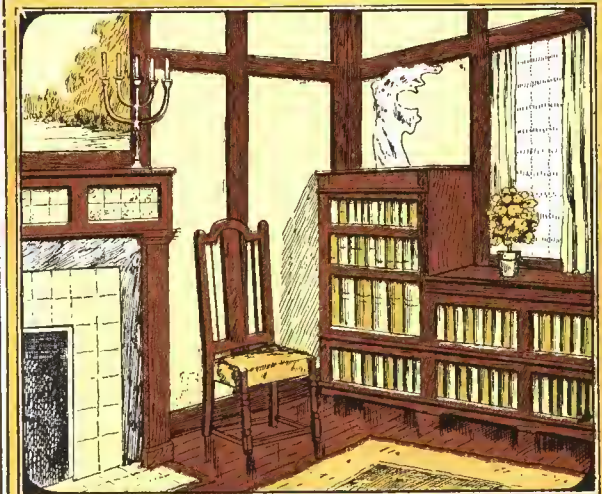

It can be applied over wall paper.

It harmonizes with any surroundings.

It affords no lodging places for dust or germs.
